

GAYASHI HASINIKA

Software Engineer Trainee

ABOUT ME

I am a motivated and enthusiastic Software Engineer Trainee with a strong interest in software development and emerging technologies. Through my current role, I have gained hands-on experience in designing, developing, and maintaining software applications while working in a professional team environment. I am passionate about learning new technologies, solving real-world problems, and continuously improving my technical and professional skills. I am eager to contribute to innovative projects, build high-quality software solutions, and grow into a skilled software engineering professional.

EDUCATION

University of Staffordshire | 2023- 2026

BSc (Hons) Computer Science

Second Class Honours (Lower Division)

Mahamaya Balika Vidyalaya - Kadawatha | 2022

G.C.E. (A/L) EXAMINATION

Physical Science Stream

Passed with 3'S

Mahamaya Balika Vidyalaya - Kadawatha | 2018

G.C.E. (O/L) EXAMINATION

Passed with 6'A and 3'B

CERTIFICATION

- HTML Essential Training - 2024

WORK EXPERIENCE

- Software Engineering Trainee**

Impresso Ceylon Holdings (PVT) LTD

From 2 nd of December 2024 to Present

- Assisted in the development and maintenance of web applications using modern software development practices.
- Collaborated with team members to implement new features and improve existing system functionality.
- Participated in debugging, testing, and troubleshooting software issues.

SKILLS

Technical

- Programming Languages:**
PHP, JavaScript
- Frontend Technologies:**
React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
- Backend Technologies:**
Laravel, RESTful APIs
- Databases:**
MySQL
- Tools & Technologies:**
Git, GitHub, Postman, VS Code

Personal

- Teamwork and collaboration
- Problem-solving ability
- Critical thinking
- Time Management
- Adaptability
- Communication Skills
- Debugging

PROJECT EXPERIENCE

1. Turtle Hatchery and Ticket Booking Website

Role: Developer

Technologies Used: HTML, CSS, JavaScript

Description: Developed a responsive website for a turtle hatchery that allows users to learn about the hatchery, view available tours, and book tickets online.

2. Rescue Stray Dogs Web App

Role: Developer , QA

Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

Description: Developed a comprehensive web application aimed at rescuing stray dogs by connecting them with shelters and potential adopters. The app allows users to report stray dogs, search for nearby shelters, and view profiles of dogs available for adoption.

3. Rescue Pets Web App using PHP

Role: Developer

Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

Description : Developed a user friendly web application aimed at rescuing pets and connecting them with adopters. Users can register and login after that they can see their profiles. As well as users can see the pets what they already repoerted.

4. Rescue Pets Web App using React.js

Role: Developer

Technologies Used: HTML, CSS, JavaScript, React.js

Description : Developed a user friendly web application aimed at rescuing pets and connecting them with adopters. Users can register and login after that they can see their profiles. As well as users can see the pets what they already repoerted and There are two forms for users to fill like user management and pet management.

5. E-commerce Web Application

Role: Developer

Technologies Used: Word-Press, Woo-commerce

Description : Developed a user friendly web application about fashion store using word-press and woo-commerce. Users can buy the clothes and they can see their carts through this application.

6. Gamified Progressive Web App for Crowdsourced Local Food and Leftover Donation (Final Year Project)

Role: Developer, QA

Technologies Used: React.js, HTML, CSS, JavaScript, Laravel, MySQL

Description: Developed a Progressive Web App (PWA) that allows users to share and donate excess food within local communities using a gamified system to encourage participation. Worked on both frontend and backend development, implementing user features such as food listing, donation tracking, and reward-based engagement. Contributed to system design, database structure, and API integration while ensuring responsive and user-friendly interface.

7. Appointment Booking Platform (Trypod)

Role: Developer

Technologies Used: React.js, HTML, CSS, JavaScript, Laravel, MySQL

Description: Developed an online appointment booking platform that allows users to easily schedule and manage appointments with service providers through a user-friendly web interface. The system supports real-time booking, availability management, and streamlined communication between users and providers.
